FRANKLIN PARK LAWN SEED

TRADE MARK REGISTERED

The Best Mixture for Sunny Lawns

Prices: $\frac{1}{2}$ lb. 35c., 1 lb. 65c., 4 lbs. \$2.40, 8 lbs. \$4.40, 16 lbs. \$8.25, 32 lbs. \$16.00, 100 lbs. \$48.00. **Postpaid in New England at above prices up to and including 32 lbs. when cash accompanies the order**

Blended only from heavy, reeleaned, live seeds of those lawn grasses known to be adapted to our soils and climate. Free from worthless chaff. High in germination. Weight 1 lb. per quart, 32 lbs. per bushel. 1 lb. (1 qt.) is suffieient for about 300 to 400 square feet.

Recognized as a quality mixture and used extensively on lawns of fine homes and large estates. Best for nearly all situations, except the most shaded spots, where we advise the use of **Perry's Shady Spot Lawn Seed**.

After spading and raking to thoroughly pulverize your soil and free it from rubbish, cover with topsoil if you wish. Broadcast **VERT** at the rate of 100 lbs. to every 4,000 square feet. We sell it and thoroughly recommend it. Then level and sow **Franklin Park Lawn Seed in all sunny situations, Shady Spot elsewhere**, at the rate of 1 lb. to every 300 to 400 square feet. Make sure you broadcast it evenly. (A Cyclone Seeder will save seed, time and patience on large areas). Roll, if not sticky, with a water weight roller to settle the seed uniformly and make the lawn smoother and more presentable. On small spaces simply raking will answer.

This man is wise to sow the best Lawn Seed he can secure, **Perry's Franklin Park**. He knows that it pays to start right, that the first saving by using "cheap" seed is lost quickly by necessary replacement of a poor catch of inferior grasses.

We advise watering at night or early morning—not when the sun shines. Cut the grass frequently with a sharp lawn mower after it first gets about 3 inches high. Dig out promptly with a Sure Grip Weeder any weeds that may spring up from weed seeds that have been lying dormant in the soil. Scatter in small amounts of additional seed where weeds have been extracted.

PERRY'S SHADY SPOT LAWN SEED

There's no better mixture for sowing on the north side of buildings, between houses or under shade trees

Prices: $\frac{1}{2}$ lb. 35c., 1 lb. 60c., 2 lbs. \$1.10, 5 lbs. \$2.70, 10 lbs. \$5.25, 20 lbs. (1 bu.) \$10.00, **postpaid**; 50 lbs. \$24.50

Postpaid in New England at above prices up to and including 20 lbs. when cash accompanies the order

Our **Shady Spot Lawn Seed** is blended from the best grasses possible to obtain for this purpose, only those that grow and flourish under shady conditions in their natural and wild state being used.

It is always advisable for those who are seeding down shady places to supply new soil, if possible, especially if large trees are produing the shade, as their roots spread so fast as to quickly exhaust its nourishment. When unable to supply this, the ground should be well dug over and tree roots taken out. Where the soil has a tendency to be sour use Land Lime (about 50 lbs. to 1,000 square feet) to sweeten it. Fertilize as for Franklin Park Lawn Seed, in sunny places.

As frost leaves the ground in early Spring, roll your lawn with a genuine Water Weight roller (see page 41) and keep it looking smooth. Increase the weight as the soil becomes drier to prevent the separation of tender grass roots from the nourishing soil.

THE LAWN. Dickinson

The best book on this important subject. You will find use for this information year after year, for it shows both how to start a lawn right and how to keep it smooth and velvety thereafter. Full of suggestions on grading, fertilizing, planting, care after planting, weed and pest control, and remaking and repairing old lawns. 128 pages, freely illustrated. \$1.25.

This man is happy for it is a pleasure to mow a fine lawn produced by sowing **Perry's Franklin Park Lawn Seed** on properly prepared soil, enriched with **Vert**, a well-balanced plant food for lawns and gardens

THE EASY GRASS SEED SOWER

Perry's Special Purpose Grass Mixtures

FOR MEADOW AND PASTURE MIXTURES, SEE PAGE 3

Bank and Terrace Mixture

Sow for Quick Results and Permanence

A splendid mixture of varieties with strong, deep-spreading roots of quick growth. Most effectual in binding loose soils, and preventing slopes from being washed out by rains. Blended for adverse conditions and to produce a fine, smooth, velvety sod of a beautiful rich green. Broadcast 25 lbs. of Vert to each 1,000 square feet and rake in lightly. Sow 1 lb. of our Bank and Terrace Mixture to each 250 to 300 square feet and rake again lightly and firm with a roller or the back of a spade. On steep slopes it may be well to sow a quart of seed oats to each 2 lbs. of seed to help retain the surface.

Lb. 50c., 5 lbs. \$2.40, 10 lbs. \$4.50, 25 lbs. \$10.00.

Perry's Bent Grass Mixture

For Those Who Appreciate Quality

A beautiful green lawn is the ambition of most home owners. Bent grasses make beautiful lawns in New England when given the necessary attention. More and more attention is being focused on Bent grasses because of the interest in golf clubs where so much Bent seed is used. To satisfy this demand we offer this mixture blended from a formula employing these fine bladed Bent grasses and calculated to produce through creeping root stocks on rich soil a closely matted turf of soft luxuriance.

Prepare your soil with unusual care and fertilize with Vert at the rate of 25 lbs. per 1000 square feet. Do not attempt to reduce the cost of starting a lawn by economizing on seed. As a rule, lawns are not large and the difference in cost between light and heavy seeding is not great. Sow seed at the rate of 1 lb. to each 250 square feet to secure a thick stand at the beginning and to assist in holding weeds in check.

Several times during the season broadcast $\frac{1}{2}$ oz. of sulphate of ammonia mixed with six times its bulk of finely sifted soil to each square yard of surface. **Lb. \$1.25, 5 lbs. \$6.10, 10 lbs. \$12.00, 20 lbs. \$23.60, 50 lbs. \$58.00, 100 lbs. \$115.00.**

Perry's Athletic Field Mixture

Admirably suited to all kinds of playgrounds that are subject to hard usage. All the grasses selected for this mixture are hardy, deep-rooted and wear-resistant. You will appreciate the quality we blend into this mixture, and the excellence of turf obtained on soils well-prepared and properly cared for. Sow 150 lbs. per acre.

Lb. 50c., 5 lbs. \$2.40, 10 lbs. \$4.50, 25 lbs. \$10.00, 100 lbs. \$38.00.

Fair Way Mixture

Blended for Severe Conditions

This mixture is a combination of grasses of a dwarf spreading habit of growth, and unexcelled for laying out new fairways or for renovating old ones. Very carefully prepared and certain to produce a firm, permanent turf that will withstand severe usage and improve with age if properly cared for. Use 100 to 150 lbs. per acre, according to soil conditions.

Lb. 50c., 5 lbs. \$2.40, 10 lbs. \$4.50, 25 lbs. \$10.00.

Putting Green Mixture

For Ideal and Lasting Greens

There is a growing demand for a lawn grass mixture that will produce at home a turf as fine as on putting greens of golf clubs. For various reasons it is usually safer to sow a mixture of grasses than to depend upon one grass. To meet these needs we have prepared a formula from those superior grasses employed on golf courses—of known high purity and germination that the utmost of satisfaction may be secured.

We recommend it highly and suggest when sowing to prepare the soil and fertilize it in the usual way. In order to secure even distribution, divide the seed and broadcast one-half each way of the lawn, allowing 1 lb. to every 150 to 250 square feet.

Lb. \$1.00, 5 lbs. \$4.90, 10 lbs. \$9.60, 20 lbs. \$18.30, 50 lbs. \$46.00, 100 lbs. \$90.00.

Lb. 60c., 5 lbs. \$2.75, 10 lbs. \$5.25, 25 lbs. \$12.50.

White Dutch Clover for Lawns

This is the popular low, creeping Clover that almost everyone wants in his lawn seed mixture because its little pink blossoms look so pretty. Grows quickly and will cover many a bare spot with bright green and dense foliage should other grasses fail. Thrives almost anywhere, but at its best in wet seasons and on heavy, moist soils. Especially adapted to pastures and should be in every pasture mixture. The seed is fine, and 8 to 10 lbs. will sow an acre. We offer an especially high grade lot of seed.

“ALL-AMERICAN” FLOWER SEED NOVELTIES FOR 1935

Each year growers from all over the world are invited to send samples of their flower seed novelties to an American committee which grows them in many sections, and then votes as to the desirability of each as shown by the trials. This gives a true index of the value of each novelty for American gardens before dissemination. Here we are glad to present the winners of such tests—**Gold Medal Winners.** You can depend upon each as being eminently worthwhile for your garden.

COSMOS, Orange Flare

Having been voted the Grand Champion in 1934, this is one of the most enthusiastically admired novelties. The bushy plants grow 2-3 feet tall, blooming in only four months from seed. Its medium-sized, single flowers are a vivid orange, on long, strong stems well suited for cutting. Its foliage is light green, Marigold-like. We do not hesitate to recommend it for general planting and wherever a mass of color is wanted. It should be included in every seed order. You will be delighted with it.

Pkt. 25c.

MARIGOLD Yellow Supreme

The lemon-yellow counterpart of the famous Carnation flowered

“Guinea Gold.” Those who have seen it growing are enthusiastic over this beautiful, profuse, quite early blooming annual. The plants are remarkably healthy, vigorous and free branching, with foliage practically free from any objectionable Marigold odor. Its large, fluffy blooms possess a mild, honey fragrance—just grand as a long-standing cut flower, calculated to give gardeners a real thrill. There is a happy surprise in store for all who choose to grow this novelty which won a Gold Medal Award in the tests.

Pkt. 25c., 1/16 oz. 35c.

GUINEA GOLD. The first Carnation-flowered Marigold and tremendously popular. Bright orange. See page 23.

Pkt. 25c., 1/8 oz. 50c.

NOVELTY COLLECTION FOR 1935

One packet each of the above seven “All-American” Flower Seed Novelties \$1.50

They are lovely new things for your garden—Easy-to-grow Annuals—so distinct and outstanding you cannot afford to be without them.

Because of its earliness, Orange Flare Cosmos may be grown successfully even in our Northernmost gardens

NASTURTIUM, Scarlet Gleam

An intensely dazzling color in this new race of sweet-scented, half-dwarf Nasturtiums that are holding such a commanding position in the esteem of the gardening public. The plants are bushy, with a few short runners, and are so set with semi-double blossoms as to appear ablaze. For cutting or garden decoration, Scarlet Gleam has but few equals. Won a coveted Gold Medal Award for its showing in 1934 trials.

Pkt. 25c.

NASTURTIUM Glorious Gleam Hybrids

Closely resembling the popular Golden Gleam in habit of growth, but the colors range through glorious shades of salmon, yellow, cerise, maroon, and crimson as well as many spotted varieties. Won an Award of Merit.

Pkt. 25c.

NASTURTIUM Golden Gleam

The first of this new race of fragrant, semi-double Nasturtiums that many feel will entirely replace all others. Golden Gleam has already proven its worth and established itself in the best American gardens. Can be forced in the greenhouse or conservatory. If you have not already become acquainted with it, you should plant Golden Gleam this year.

Pkt. 15c., oz. 50c.

CALENDULA, Orange Shaggy

Here is a new “break” in Calendulas—the most graceful and unique yet seen. Row after row of long, deeply fringed or laciniated petals overlap each other in a rather irregular fashion, to present blooms with the shaggy appearance of some Chrysanthemums. They have a beauty and grace quite in contrast to the formal appearance of that old favorite, Orange King. The deep orange color of the blooms shades to a slightly lighter hue in the center—a delightful two-toned effect. The plants grow about 18 inches tall. Orange Shaggy will please all lovers of yellow flowers for many happy blends and contrasts are possible with it. Won a Gold Medal Award.

Pkt. 25c.

RECENT NOVELTIES OF MERIT

GAILLARDIA, Indian Chief

For a wealth of Summer blooms few annuals can equal this gorgeous, bronzy-red, broad-rayed flower of sparkling beauty. The dense, bushy plants grow about a foot high and bloom continuously in profusion.

Pkt. 25c.

GYPSOPHILA PACIFICA

A good rose-colored perennial Babysbreath, coming into flower after the common white Paniculata varieties have passed. The 3½ to 4 foot plants are a veritable cloud of tiny blooms the first season from seed. Valuable as a filler for all bouquets. H.P.

Pkt. 50c.

HUNNEMANNIA, Sunlite

This clear, canary-yellow Giant Tulip Poppy is very pretty and does well in a sunny position in well drained soil. It is a semi-double cut flower with lasting qualities and a long season of bloom; combines well with your favorite blue flowers.

Pkt. 20c.

LARKSPUR, Rosamond

The individual florets of this distinct, pure, bright rose self color are large and very double, evenly and closely placed on stems about 4 feet tall. It is nearly two weeks earlier and gives a good cut before other Larkspurs are available. So outstanding as to win a Gold Medal Award in 1933, but sold out so early that we could not offer it in 1934.

Pkt. 25c.

ANNUAL LUPINES

HARTWEGI GIANTS (H.A.) An improved strain—a match for the regal Polyphyllus (perennial) varieties in size and beauty. They are excellent for cutting and may be successfully forced under glass. 3 to 4 feet.

King Blue. Enormous spikes of rich Oxford blue, enhanced by a pure white stripe in the standard of each flower.

Pkt. 25c.

King White. A pure white companion to King Blue. Delightfully scented.

Pkt. 25c.

Hartwegi Giants Mixed. Its colors include dark blue, sky blue, rose, and white shades.

Pkt. 25c.

MARIGOLD, Josephine

From among the tall French sorts this variety shines forth to win the admiration of critical flower lovers. Growing 2-2½ feet tall, it produces an abundance of velvety textured, golden brown blooms, each with a threadlike golden edge. Extremely attractive for cutting even though some variation exists in the colorings.

Pkt. 10c., ¼ oz. 30c.

MARIGOLD, Royal Scot

A most striking color in the Double French type, growing 24 to 30 inches high—a charming combination of mahogany and gold in symmetrical stripes radiating from the center of each flower. Its blooms are double, well formed, and produced in abundance.

Pkt. 25c.

PETUNIAS

DIENER'S MAUVE (H.A.) Diener, the originator, says about this ruffled monster: "It is one of my most exquisite and popular varieties. The average flowers are 5 in. across, and are very fragrant. The center of each single flower is heavily veined with royal purple." Pkt. \$1.00.

DOUBLE FRINGED, ROSE PINK AND WHITE (H.A.) A tremendously beautiful double fringed Petunia of the largest size, best described as a bright rose pink with a large white frill, giving each bloom the appearance of huge balls of lace.

Pkt. \$1.00.

GIANT DOUBLE FRINGED "VICTORIOUS." The finest strain of large flowering, dwarf, double Petunias yet seen. A wonderful assortment of brilliant and fancy colors will be found in this superb mixture. Pkt. 50c.

SCABIOSA (Mourning Bride)

BLUE COCKADE (H.A.) This outstanding novelty is deeper than Azurc Fairy in color; in fact, the purest, deep azure blue to be found in any annual. Quite unlike the ordinary type, the flowers have such a great depth of head as to appear almost conical in shape. Won an Award of Merit from the Royal Horticultural Society of Great Britain.

Pkt. 25c.

ZINNIA, Fantasy

This very informal, shaggy Zinnia is quite distinct from the stiff, bold, Dahlia-flowered type that has held the attention of the gardening public for so long. It is most fascinating and graceful. The rounded, medium sized blooms are a mass of quilled and twisted, raylike petals in the brightest shades of reds, yellow and orange, as well as the popular pastel pinks and cream.

Mixed Colors Only. Pkt. 25c.

ZINNIA, Scabious Flowered

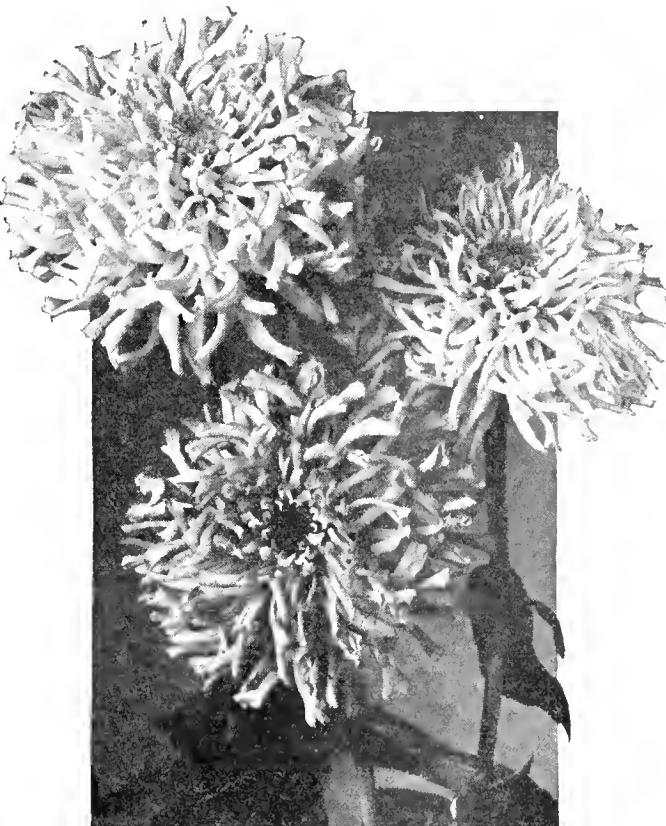

About the cone of quilled petals in the center of each flower is a single row of large petals which makes these decidedly unique flowers resemble Scabiosas, hence the name. Of only fair size, yet exceedingly effective as cut flowers, appearing in pleasing shades of scarlet, orange, yellow, pink and white.

Mixed Colors Only. Pkt. 25c.

VERBENA VENOSA

LILACINA (H.H.P.) Growing a foot and producing such a mass of flowers as to hide all the foliage, this new variety with delicate lavender blue flowers is at once acceptable for carpet bedding, borders, and for cutting—valuable for color schemes, too.

Pkt. 35c.

Zinnia Fantasy, a unique variety with quilled and twisted petals, that is of striking appearance

Perry's Dwarf Wild Garden Mixture

Perry's Tall Wild Garden Mixture

Because of lack of space, we have been obliged to curtail much of the information about the culture of these flowers, seed of which we offer for sale, but directions will be found on the packages themselves, directions that are sufficiently explicit for the success of which you dream—enjoyment you anticipate when you make a purchase.

The following abbreviations are used throughout our flower seed list that you may have some guide as to proper treatment.

H.H.A. Half Hardy Annuals.

H.A. **Hardy Annuals.** Seed may be sown in the open to endure ordinary weather to killing Autumn frosts. Sowing seed indoors or in frames will hasten blooming.

H.B. **Hardy Biennials.** Bloom one season only.

H.H.P. **Half Hardy Perennials.**

H.P. **Hardy Perennials.** Should not require Winter protection. Seed should be sown early enough to produce husky plants before frost. Often seed sown indoors will bloom the first season.

G.A. **Greenhouse Annuals.** Very tender.

G.P. **Greenhouse Perennials.** Always kept inside.

CHRYSANTHEMUM. H. H. P.

Cascade or Japanese Mountain. Train in bush form or allow to trail from pots or window boxes. Its clusters of single blooms are borne in the greatest profusion in many attractive shades. **Mixed colors only.**

Pkt. 35c.

DAHLIA. H. H. P.

Pkt. 25c.

DIANTHUS. H. A.

This is a most striking novelty that ought to prove valuable for Midsummer blooms in the rockery where a bright dash of color is needed. Flowers we have seen are easily as big as a half-dollar in a brilliant shade of crimson with a large, boldly contrasting white eye.

Pkt. 15c.

HIBISCUS. (Mallow). H. P.

Giant Flowered Red. Valuable for bold effects in tall, hardy borders. Loves moist locations.

Pkt. 10c., 1/4 oz. 40c.

LARKSPUR, Giant Imperial. H. A.

Blue Bell. Deeper than sky-blue; decidedly upright with long, basal-branched spikes.

Pkt. 25c., 1/8 oz. 40c.

SALVIA (Blue Salvia). H. H. P.

farinacea, Blue Bedder. Deep blue. More dwarf and compact than farinacea. Best treated as an annual.

Pkt. 25c.

SHASTA DAISY. H. P.

Diener's New Giant Double White. An assortment of various types of double flowers ranging from the most double fringed sorts through semi-doubles to singles with beautifully curled and quilled petals.

Pkt. 25c.

TITHONIA (Golden Flower of the Incas). H. A.

speciosa. Brilliant orange-vermilion single flowers resembling single Marigolds, but with Dahlia-like foliage. Superb for backgrounds. 6 to 8 ft.

Pkt. 50c.

VERBENA. H. A.

Spectrum Red. An intense, bright red of the largest size and brilliance.

Pkt. 25c.

VENIDIUM (Monarch of the Veldt). H. A.

fastuosum. Large, deep orange daisy-like flowers, each marked with a wide reddish-brown center ring. Fascinating in the garden or in bouquets.

Pkt. 25c.

ZINNIA. H. A.

Double Mexican Hybrids (Haageana). For bedding or cut for bouquets these smaller flowered Zinnias possess a charm of their own, for many attractive colors and color combinations appear in this strain. **Mixed colors only.**

Pkt. 15c.

Early Wonder, Fiery Salmon Cerise Pink. A new race of dwarf, early flowering Zinnias producing masses of medium sized blooms on long stems that florists especially will like for cutting.

PLANT PERRY'S HARDY LILIES

No garden is complete without Lilies. Suitable varieties may be found for almost any situation. The fullest measure of decorative effect is secured when Lilies are used in combination with other plants and shrubs. Striking effects are produced by planting them among tall growing perennials, in front of large shrubs, or among dwarf shrubbery, so that the blossoms may rise above its foliage. Provide a Winter mulch of peat moss.

SPRAYING IS A NECESSITY

The successful production of farm and orchard crops, as well as ornamentals of every kind, depends to a large degree upon the protection afforded against bacterial and fungous diseases, and injurious insects. Our list of Fungicides and Insecticides on the following pages, comprises the most important spray materials on the market—the standard, dependable kinds. Likewise, the spraying equipment is representative of modern, up-to-date types in good reliable merchandise—the kind you can depend upon for results. Your health, strength and time are too valuable to expend with low grade, cheap tools.

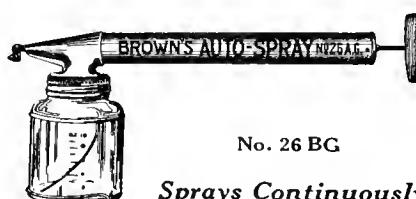

"Delayed Dormant" Spray

The "Dormant" Spray on Apples, with either Scalecide or Lime Sulphur solution, is primarily to kill scale. The "Delayed Dormant" is preferable, for it controls other insects as well. Use Black Leaf 40 (nicotine sulphate), with Lime Sulphur for aphids. Scalecide alone kills aphids, the bud moth and the eggs of the European red mite, a very troublesome pest in New England. The "Pink Spray" is for scab control; Lime Sulphur

We like to recommend 5-8-7 Fertilizer as a high grade, general purpose plant food that can be depended upon for results. More 5-8-7 is sold annually in Massachusetts than any other grade of chemical fertilizer. Its use is endorsed by state authorities and gardeners everywhere. It contains all the elements essential to quick growth, productiveness, and quality. Valuable alike for vegetables, flowers, fruits and grass. Moderate in price, too. WIZARD BRAND MANURES

Stable manure is recognized as highly desirable for all kinds of crops growing on the farm, in greenhouses, or in gardens. With the decline of private stables and the removal of dairies to distant suburban districts, barnyard manure is practically unavailable to every city and metropolitan district gardener. For over 25 years we have been supplying wide-awake gardeners with Wizard Brand Manures, both Cow and Sheep, in convenient form without the objectionable features of ordinary stable manure. All Wizard Brand Manures have been heat-treated to eliminate moisture and to kill weed seeds of all kinds. They are concentrated and contain all the essential humus. Their plant food is quickly available and eagerly sought for by knowing gardeners. Valuable also for mulches.

Vert is rich in the most expensive (and at the same time most valuable to plants) fertilizing elements—5 per cent nitrogen that develops bright green foliage rapidly and in abundance; 8 per cent phosphoric acid that stimulates quick root growth and promotes early maturity; 6 per cent potash for plump, ripe fruits, seeds and tubers.

Broadcast Vert on your lawn and water promptly with a hose and you will be surprised at how quickly the grass responds.

Stir Vert in carefully under seeds and you will be astonished at the speed your flowers and vegetables develop.

Feed Vert to trees and shrubs; you will marvel at their improved luxuriance.

Follow the early Spring applications with others at intervals during the Summer to secure the maximum of results—you wouldn't want but one meal a year, would you?
